

# THE DIABETES SCOOP

The Pennsylvania Pharmacists Association (PPA) is thrilled to introduce an abbreviated **Diabetes Self-Management Education and Support (DSMES)** accreditation program designed for pharmacies seeking to achieve accreditation.

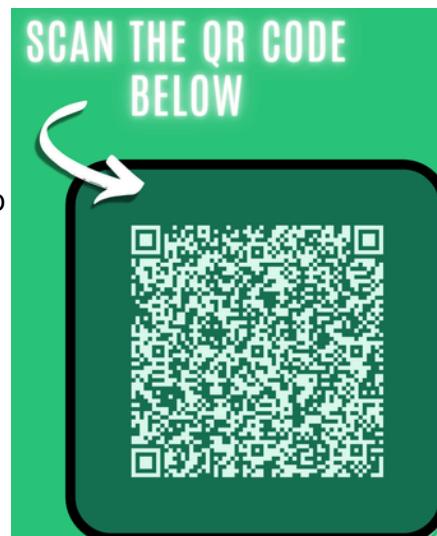

The program includes **three pre-recorded 1-hour videos**, each accompanied by a **30-minute online discussion session** held every other week, starting in March. Participants can watch the pre-recorded videos at their convenience, provided they complete them before the corresponding discussion session.

## PPA's DSMES Program:

- Provides pharmacies with tools and resources to implement DSMES programs aligned with National Standards.
- Enhances clinical services to support better health outcomes for patients with diabetes.
- Offers valuable Continuing Education (CE) credits for pharmacists.
- Includes ADCES accreditation, enabling access to innovative reimbursement models.

This year, the program is **fully subsidized by a CDC grant**, covering both the **cost of participation and the ADCES accreditation fee** for interested pharmacies.

PPA will provide comprehensive support, including templates, toolkits, and expert guidance throughout the accreditation process. Don't miss this chance to elevate your pharmacy's role in diabetes care and support while earning CE credits in a cost-free, value-packed program. If you're interested in PPA's DSMES accreditation program, please scan the QR code to express your interest.

2. Ability to identify patients with hearing or visual impairment, decreased mobility, or other limitations to completing activities of daily living
3. Updates to identification of race and ethnicity

## Overwhelmed?!

[No worries- check out this Q&A!](#)

Join us on **Sunday 2/16 for the DPP Advanced Coach Training** for a live review!

The CDC provides an enrollment form in **Appendix D of the 2024 DPRP Standards** that captures all required elements.

Don't forget to update your data submission to the 2024 .CSV format to account for the updates!

- **Pending**- successfully submitted application to begin curriculum
- **Preliminary**- submission of at least 12 months of data and one complete cohort of 5 participants
- **Full**- Same as preliminary + participants meet benchmarks of weight loss, physical activity, or HbA1C reduction.
- **Full Plus** - Same as full + increased participants retention and attendance awarding the program an additional 2 years of recognition.
